(54) ENHANCED GRAPHIC USER INTERFACE FOR MOBILE RADIOPHONE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a graphic user interface for a mobile radiophone having functions enhanced.

SOLUTION: A radiophone has a display 208 for efficiently presenting information of a list and a text field. In each list, the display 208 presents a title message 300 with unique identification marks 332 and 334, a list end-point indicator, and a dynamic scroll indicator 308 indicating a scroll direction. When a context-dependency menu is usable as to a highlight-displayed item, a context-dependency symbol 306 is displayed. In special data input mode, information is efficiently collected, displayed and inputted.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
